

**Accumulatus** software was created for museum curators and biologists to manage their natural history collections.

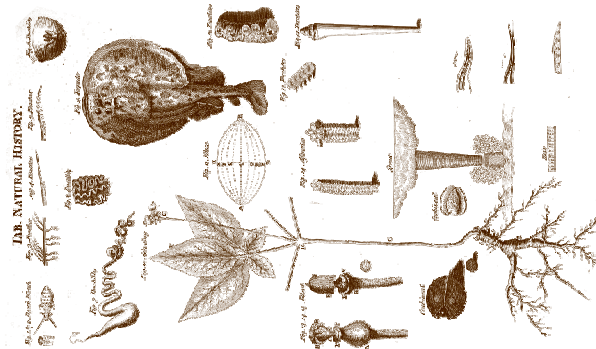

**Accumulatus** is sophisticated but easy to use. It is designed for a museum with multiple networked users, but it is just as easy to use on a single PC.

**Accumulatus** is practical for both small and large collections, offering a full range of features at a very reasonable cost.

**Accumulatus** is valuable for:

- Museum Curators
- Ornithologists
- Entomologists
- Mammalogists
- Ichthyologists
- Herpetologists
- Conservation Ecologists
- Botanists
- Geologists
- Paleontologists
- Anyone who has collection items that need to be organized.

**Accumulatus**  
Software for the Natural History Collector

**Accumulatus** (orig. 1520 Latin): to gather or collect, often in gradual degrees -- form a steadily increasing quantity

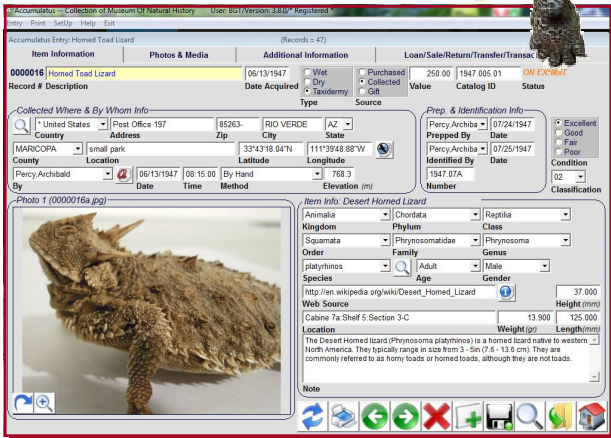

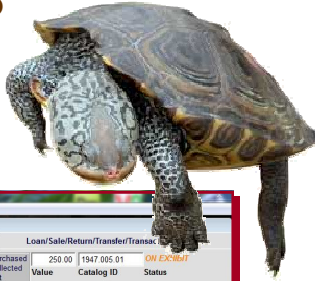

Collection Management Software now available to the public: visit [www.Accumulatus.com](http://www.Accumulatus.com) for a Free Trial Version.

# Accumulatus

## Software for the Natural History Collector

**Accumulatus** was created for museum curators to help organize and manage their natural history collections.

**Accumulatus** can help you know how many items you have, where they are stored, what's

on exhibit, what's out on loan, and every specimen's acquisition and use history. You can attach photos, PDF, audio, and video to each specimen entry. Access can easily be controlled by user names and passwords.

Items can be placed in many different discipline classifications, such as

- Herpetology
- Ichthyology
- Entomology
- Ornithology
- Mammalogy
- Botany
- Geology
- Archaeology
- Anthropology
- Paleontology
- Malacology
- Ethnography

• Sort • Search • Label •  
• Print • Track • Publish •

The software comes preloaded with over 332,000 species of animals and plants from the Integrated Taxonomic Information System (ITIS) database, including mammals, birds, reptiles, fishes, and amphibians.

One of the most-used features of **Accumulatus** is the ability to output reports in PDF and HTML format.

**Accumulatus** can quickly produce a photo album of all your specimens... or a detailed list of your specimens by species... or labels for your latest collected specimens. Reports can be sorted and selected by multiple criteria, including by entry date, acquisition date, collection date, status, and many more.

Your collection can be better organized! Questions? Visit our website ([www.Accumulatus.com](http://www.Accumulatus.com)) or call Barry Taylor @336.451.9547.
