Setup of Computers and Networking (New and Replacement)

ASLAN Solutions can set up individual PC's or complete networks for organizations. We can recommend and/or purchase new computers for you, backup current data, configure new PC's with application software, anti-virus software, networking, and other necessities, as well as reloading your data.

Website Design and Maintenance

ASLAN Solutions has many years of expertise in website design and programming. Whether you need a simple "brochure-style" webpage to announce information to your customers, or you want to collect and distribute information from the web, ASLAN can accommodate you.

We can recommend and/or setup web hosting, domain names, website pages, and maintenance of your site. However much or little you need on the web, ASLAN can design it.

Marketing Materials

ASLAN Solutions has extensive experience in graphic design and creation of marketing materials. Whether you are starting a business and need a logo and 'brand,' or if you want to redesign and update your current brand, we can help. We specialize in recreating forms for more efficiency and professionalism.

We produce personalized newsletters, brochures, special events flyers, and other printed materials. ASLAN consultants have created marketing and in-house prints for legal firms, finance firms, insurance agencies, and non-profit organizations.

All of our services are also available for individuals.

Custom Computer Programming and Applications Design

Many offices can purchase and use software "packages" right off the shelf. We can help you select one that is right for you, installing it and training your employees.

However, many organizations prefer customized programs to run their business. This can include database entry and reporting, workflow, and communications, as well as back office, accounting, and sales figures. ASLAN Solutions has extensive experience with custom programming for many industries, including insurance, retail, non-profit, and manufacturing.

Creation of High Definition Videos for DVD/BluRay/Web

ASLAN Solutions has expertise with custom video creation. We can also edit and duplicate videos that you have captured. Video can be uploaded for the web, or sent out on DVD's or in high definition quality on BluRays.

For our own enjoyment, we created a montage of musical movie numbers called "Musical Medley I." Please visit our website to see the chapters for this Medley, or previews of "Musical Medley II." Would you like for us to create a mixture of your favorites? We can!
